

architecture and the poetics of interaction

architecture as...

- hardware: walls, roofs, floors
- software: sounds, smells, radio waves
- operating system: programmes for spatial interaction

spatial configurations

- designing to encourage interaction
- designing for spatial poeties

spatial frameworks

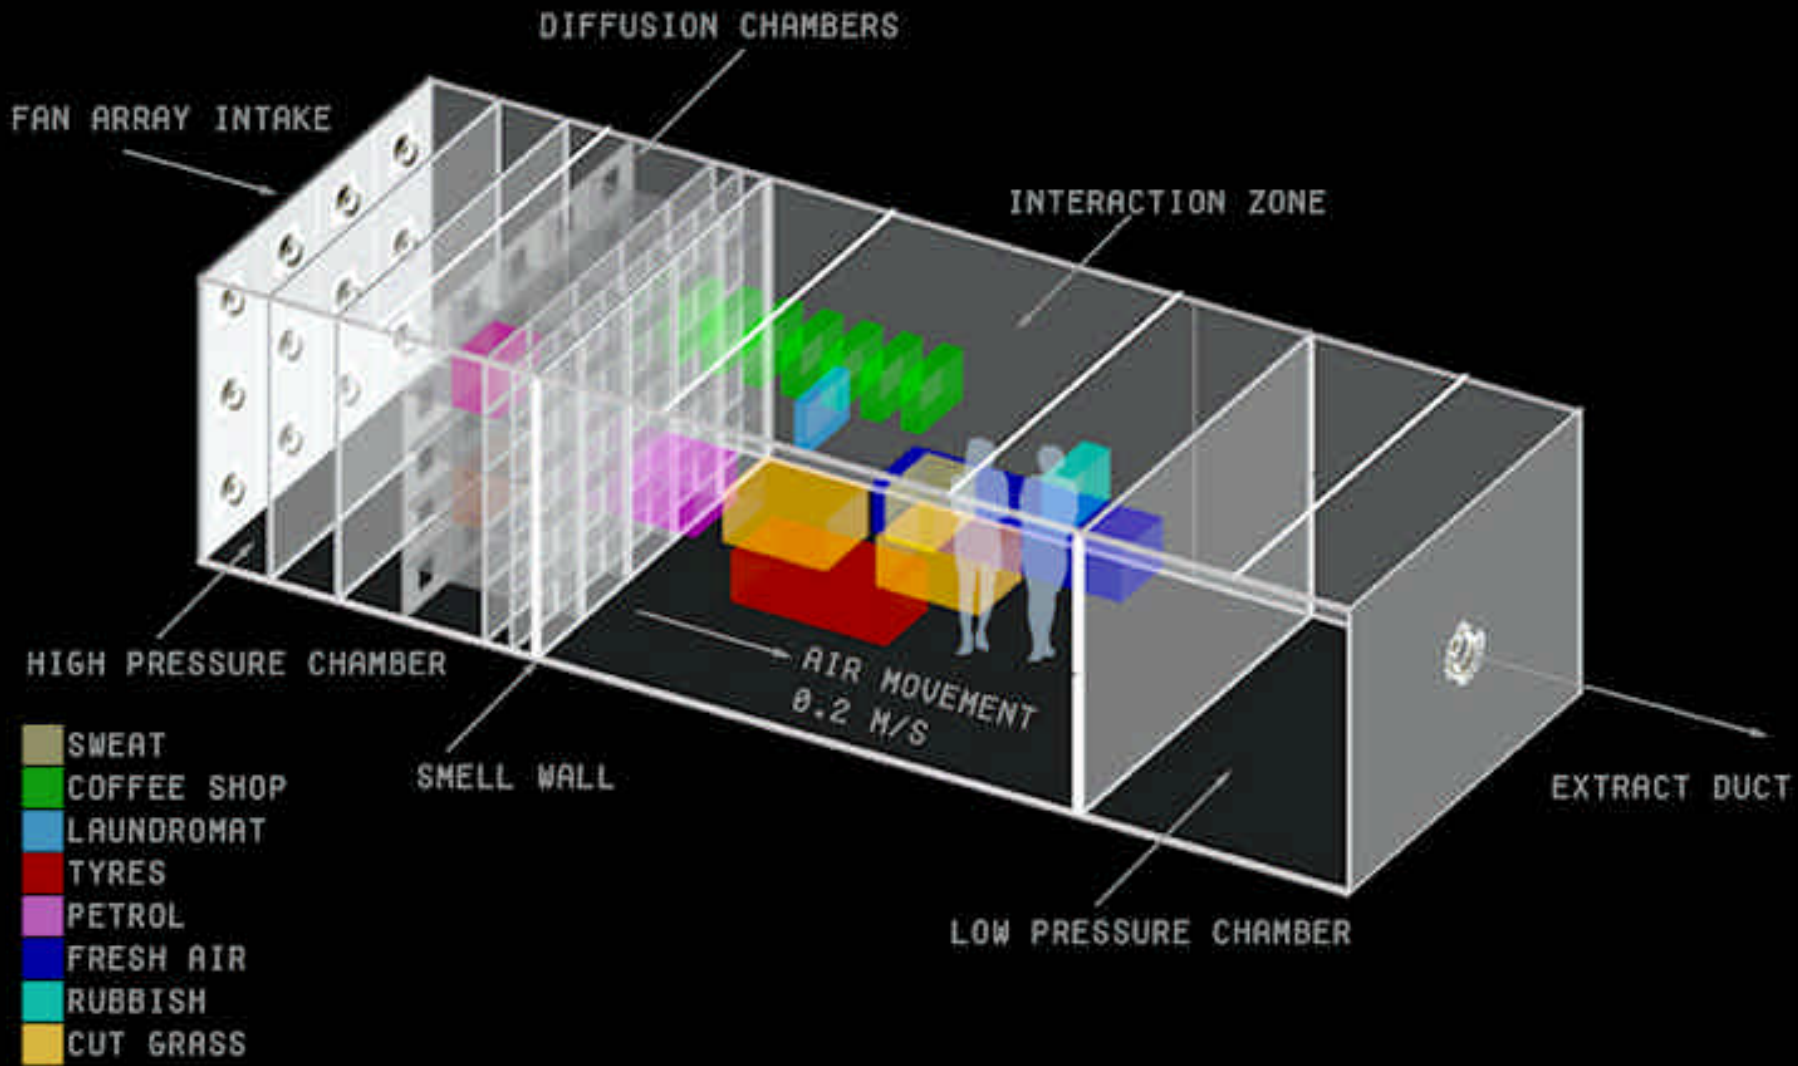

- enable conversations with an environment
- rich, suggestive outputs

Scents of Space

- an interactive smell installation
- positioning fragrances in three dimensional space
- creating spatial scent collages

spatial operating system

- the production of space is collaborative
- open source architecture

architecture & ubicomp

- encouraging creativity on the part of users/participants/interactors
- systems that are enriched by participation
- benefits from different logics and poetics

architecture and the poeties of interaction
